

Licenses

Our subscriptions differ not only in terms of available datasets and API request volumes, but also in service features (support, availability, etc). One of these important features is the license that applies to your usage of our product. This license defines how you, as a user, can make us of our products.

Open license	"OpenWeather for Business" license	"OpenWeather for Business" license (via Enterprise plan)
<p>Short summary: Flexible license for small-scale projects. Allows data to be built into a commercial derivative product*, however, with a requirement on how the user should then distribute the derivative product (ShareAlike).</p>	<p>Short summary: Recommended license for business users. Allows the user to build a commercial derivative product*, with no requirement on how this derivative product should then be distributed by the user</p>	<p>Short summary: Recommended license for business users. Allows the user to build a commercial derivative product*, with no requirement on how this derivative product should then be distributed by the user. Does not require attribution to OpenWeather to be made.</p>
<p>Applicable in: One Call 3,0 “pay-as-you-go”, Free, Startup, Developer subscriptions</p> <p>Link: CC BY-SA 4.0, ODbL</p>	<p>Applicable in: Professional and Expert subscriptions, One Call 3.0 business packages</p> <p>“OpenWeather for Business” License for Professional and Expert subscriptions</p>	<p>Applicable in: Enterprise subscription, One Call 3.0 business packages</p> <p>“OpenWeather for Business” License for Enterprise subscription. License agreement is provided upon request, please contact us for details.</p>
<div>Attribution<p>Attribution is required to OpenWeather within the solution. Please find the attribution requirements on our FAQ page</p></div>	<div>Attribution<p>Attribution is required to OpenWeather within the solution. Please find the attribution requirements on our FAQ page</p></div>	<div>Attribution<p>Not required.</p></div>
<div>Share-Alike requirement<p>Commercial usage is allowed. However, any derivative work* the user creates based on OpenWeather data/APIs (e.g. user’s app) needs to be distributed also on the basis of same open license.</p></div>	<div>Share-Alike requirement<p>Not applicable. Commercial usage is allowed and user is welcome to distribute his derivative solution based on his own preferred license</p></div>	<div>Share-Alike requirement<p>Not applicable. Commercial usage is allowed and user is welcome to distribute his derivative solution based on his own preferred license</p></div>
<div>Sublicensing & Reselling<p>User is allowed to use data only for internal use or to develop and distribute his derivative product based on OW data. Sublicensing and reselling of original OpenWeather solution is not allowed by default but can be arranged separately.</p></div>	<div>Sublicensing & Reselling<p>User is allowed to use data only for internal use or to develop and distribute his derivative product based on OW data.
